

Empowering Educators in the Digital Age: Bridging the Professional Development Gap

Presented by: Leigh Davidson

October 23, 2025

Who Am I?

Leigh Davidson
*Professional Development &
Distance Learning Specialist*

North Carolina Community College System Office

Putting the Cart before the Horse

Based on research from Dr. Elizabeth Roumell and Sarah Haroon Sualehi (Texas A&M University), in which they explored the gap between student focused digital literacy efforts and the professional development offered by instructors.

Icebreaker

How Digitally Literate Are You?

Digital Literacy

Definition

"Digital literacy is the ability to access, manage, understand, integrate, communicate, evaluate and create information safely and appropriately through digital technologies for employment, decent jobs and entrepreneurship."

—*UNESCO Institute for Statistics, 2018*

 Access

 Manage

 Understand

 Integrate

 Communicate

 Evaluate

 Create

Two Digital Divides

First Divide: Access

- Hardware is present
- Software is present
- Connectivity exists

Second Divide: Adoption

- Skills building opportunities
- Usage is encouraged
- Communal support

Am I a Digital Native because...

I have access to technology through personal and professional roles (re: phone, PC, laptop, wifi) and I figured out how to use them?

OR

I had regular professional development and training opportunities to build my digital skills, with communal encouragement from my peers and colleagues?

What happens when the digital world
keeps turning, but we assume that
digital skills learning will *just*
happen?

Digital Literacy vs Competency vs Fluency?

What is it?

**Literacy =
Skills + Knowledge**

Access, Manage,
Understand, Integrate,
Communicate, Evaluate,
Create

**Competency =
Skills + Knowledge
+ Attitude**

Confidence,
Critically Engage

**Fluency =
Deep Knowledge
+ Mastery**

Innovate, Adapt,
Critically Think,
Transfer/Evolve/Pivot,
Problem Solve

Some Basic Assumptions

Access

Everyone has the same access to digital technology

Andragogy

Everyone is able to self-teach digital skills

Adoption

Professional development is available, you just have to take it

Some Basic Facts

37%

Of the world has
never used the
internet

33%

Of US adults do
not have access to
broadband

51%

Of adults in the
US are
uncomfortable
learning digital
skills

68%

Of the digitally
illiterate
population in the
USA are native-
born adults

Both?

Not all, but for some teachers...

System Expectations

Professional Development

Barriers to Learning

Three Recognized Barriers to Adult Learning

1. Dispositional

Negative perceptions
about ability to learn

"I'm too old to learn"

2. Situational

Conditions that limit
ability to learn

"Work takes up all my time"

3. Institutional

Procedures &
requirements
cannot be currently met

"I am not eligible for PD yet"

Which Barrier Can PD Help Overcome?

1. Dispositional

Negative perceptions
about ability to learn

"I'm too old to learn"

2. Situational

Conditions that limit
ability to learn

"Work takes up all my time"

3. Institutional

Procedures &
requirements
cannot be currently met

"I am not eligible for PD yet"

Simulation

Simulation

01

Current Role

You teach digital literacy modules: email, Microsoft Word, Excel

02

Challenge

State-mandated career pathways program for software developers

03

Your Task

Develop a 60-minute lesson on the basic "How-To's" for APIs as a software developer

04

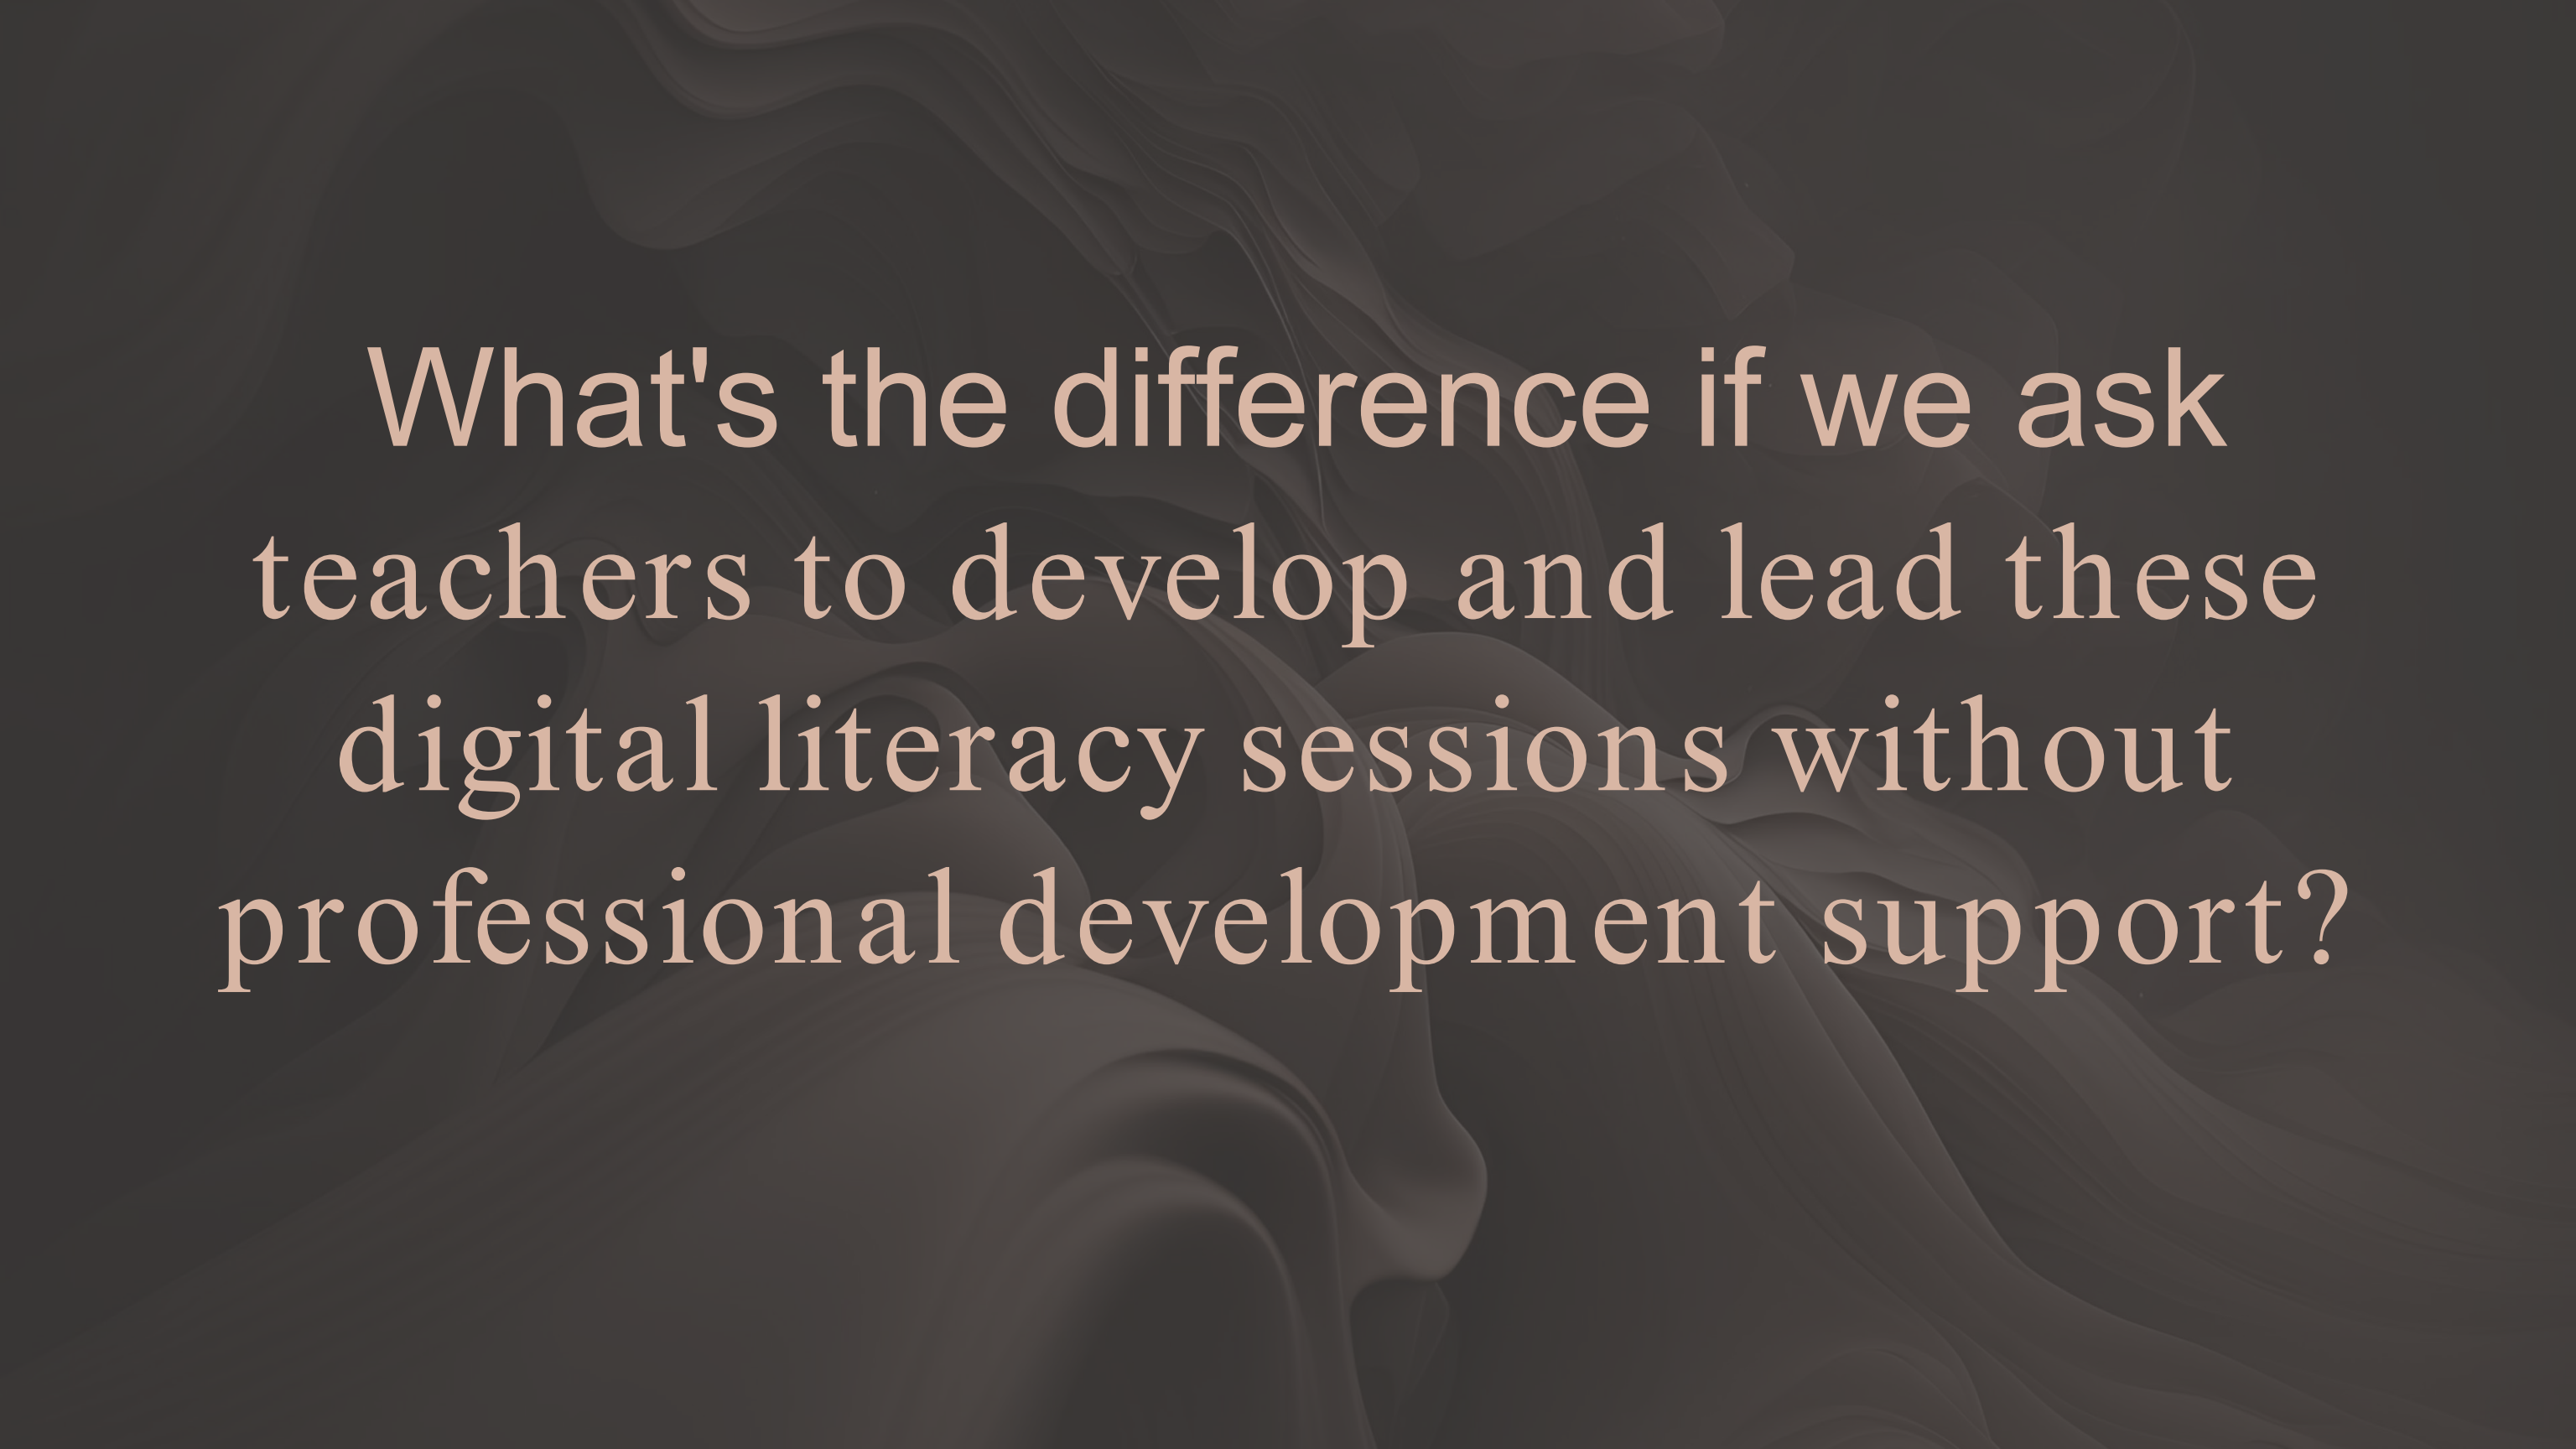

Activity Instructions

Work with your group partners.
Ready... go!

Simulation: Debrief

- How did that go?
- What helped you?
- What held you back?
- How did that make you feel?
- What could I have done to support you?

The background of the slide features a dark, monochromatic image of a person's head in profile, facing right. Inside the head, there are intricate, wavy, smoke-like patterns in a slightly lighter shade of gray, creating a sense of movement and thought. The overall tone is professional and contemplative.

What's the difference if we ask
teachers to develop and lead these
digital literacy sessions without
professional development support?

Professional Development
improves
teacher self-efficacy

**Literacy =
Skills + Knowledge**

Access, Manage,
Understand, Integrate,
Communicate, Evaluate,
Create

**Competency =
Attitude + Skills
+ Knowledge**

Confidence,
Critically Engage

**Fluency =
Deep Knowledge
+ Mastery**

Innovate, Adapt,
Critically Think,
Transfer/Evolve/Pivot,
Problem Solve

Lessons Learned

Technology for Connection

Necessary connections to plan for:

When we use tools to build **meaningful connections** and directly support desired learning, both content and technology skills development are supported.

And how does
Generative AI fit into
these considerations?

Things to Consider...

Psychological Safety

Is it safe for your teachers to admit when they don't know something?

Could it jeopardize their job?

Irony

Does your training already require an amount of digital literacy

(is it online or requires use of an unfamiliar application/platform)?

Honesty

Are your system expectations requiring digital abilities before digital training?

NC-Context

Learning Specialist*

davidsonl@nccommunitycolleges.edu

Survey Questions

1) Useful Data

- How many of your instructors are full/part -time?
- How many of those instructors teach synchronous online classes?
- Does your program currently offer PD (*digital literacy development* for instructors and/or training on *synchronous online instruction* or *instructional technology*)?

Survey Questions

2) Local-Provider PD/Training

- Type(s) of PD/training provided to your instructors?
- Frequency of this training (*monthly, quarterly, annually, instructor onboarding, as needed*)?
- Effectiveness of this PD/training (to improve instructor skills & competencies)?
- How do you assess the impact of your PD/training on instructional quality?
- Any successful strategies/models to improve your instructors' digital competencies?
- Any recommendations to enhance PD/training for online instruction?

Survey Questions

3) Challenges & Future Needs

- Biggest challenges in providing digital literacy and instructional technology professional development to instructors?
- What specific digital skills or tools do your instructors struggle with the most?
- What types of professional development, or resources, would be most beneficial to your instructors?

Type(s) of Training

- Video-conferencing (e.g. Zoom)
- Use of specific tools & platforms (*Burlington English, Nearpod, Canvas, Moodle Northstar, Newsela*)
- Virtual classroom management
- Use of smartboard & collaborative platforms

Training Frequency

- Varies widely (quarterly, during onboarding, as needed)
- Some with no formal schedule OR
- Reliance on informal mentoring

Training Effectiveness

- Mixed responses
 - 3 or 4 out of 5
 - Unsure
 - Low effectiveness
- Programs with structured PD & instructor onboarding, external support (e.g.: vendor visits), and in-house support (e.g.: digital navigators) reported **higher success**

Common Challenges

- X Instructor buy -in & time limitations (part-time)
- X Technology phobia or discomfort
- X Funding constraints
- X Lack of access to devices or reliable internet
- X Difficulty finding best practices for synchronous instruction

Instructor Struggles

- Navigating platforms
- Integrating tech meaningfully into lessons
- Managing hybrid or synchronous environments
- Learning new software or tools
- Engaging students virtually
- Stable connectivity

Successful Strategies/Models

- **Techie Fridays:** casual, low-stakes workshops
- **Digital navigators :** in-class support
- **Vendor partnerships :** e.g., Burlington English reps providing hands-on support
- **Embedding tech into regular PD sessions**

Role of the State Office???

- ✓ Pool resources across providers to offer joint PD sessions
 - ✓ Regional PD Consortia
 - ✓ Professional Learning Communities (PLCs)
- ✓ Micro-learning opportunities (Rhode Island Tech Tuesdays)
- ✓ Leverage the Digital Navigator Network (DNN)
- ✓ Prioritize training and technical assistance on high demand software
